With our manual guns, automatic and robotic applicators that are supplied with our wide range of pumps and machines for fluid handling, dosing, mixing and dispensing, **SAMES KREMLIN** provides industrial solutions to increase production, improve quality, and material & costs savings.

We are designers and manufacturers of process equipment that is divided into 6 ranges:

- Airspray:** Since 1925, we have been an Airspray manufacturer bringing you the very best in finishing.

Airmix®: Creator of Airmix® Technology since 1975, we provide the perfect mix between quality and productivity.

Airless: We provide premium Airless Products for finishers with demanding applications.
- Dispense:** Pumping beyond possible, dispensing precisely.

Electrostatic Liquid: Expertise for high finishing quality & efficiency.

Powder: Coating solutions for the highest productivity since 1960.

FPRO Airspray

Perfectly balanced, the FPro spray gun provides a superior finish for all painters. **SAMES KREMLIN** offers the largest range of spray guns and accessories for all FPro applications in high finishing markets.

FPRO, THE NEW STANDARD IN AIRSPRAY. In 1925, **SAMES KREMLIN** created Airspray technology. In 2017, they reinvented paint atomization with patented innovations for the Airspray market. With decades of experience in prestigious customer applications, **SAMES KREMLIN** developed a brand new axis.

This **PATENTED** innovative restrictor controls and pre-atomizes the paint into smaller droplets. Slowing down the paint speed and leaving time for the aircap to atomize paint at the perfect droplet size avoids bounce back onto the part and increasing transfer efficiency. The **PATENTED** Vortex spins the paint allowing a high level of paint concentration onto complex-shaped parts. The transfer efficiency increases, and an even better finish quality is achieved.

Paint Restrictor

Paint Vortex

Performance

- 1 The FPro spray gun provides a superior finish for all painters
 - 2 Patent pending Restrictor paint speed controller and Patent pending Vortex spin effect delivers a perfect atomization with very high transfer efficiency (up to 78% in HVLP)
 - 3 Three atomization and aircaps technologies: Conventional, LVLP and HVLP versions available
 - 4 Three different adjustment knobs to get the perfect spray pattern in all conditions
- The **widest range** of spray guns and accessories for all applications in markets that require high finishing spraying.

Productivity

- 5 Perfectly balanced for reduced repetitive strain injuries
- 6 The FPro is an extension of the arm creating a natural working tool for painters
- 7 High level of sensation on the trigger for perfectly spraying paint
- 8 Reduced handle volume - ideal for operators with smaller hands

Sustainability

- 9 Elegant design, high quality metal, machining and anodization makes the FPro – the ultimate spray gun application solution
 - 10 New generation of super light hoses, lightweight spray gun body and ergonomic handling, FPro applies coatings with ease
- Simplified** and **quick** maintenance due to the reduced number of components.
